Ignite a passion for excellence

Digital Industry Trailblazer Apprentices shine brighter with BCS, and so will your training organisation. As the professional body for IT, we've been working with employers and professionals for more than 50 years, setting the standards and developing the skills that drive today's digital economy. We are the proven experts in developing and assessing digital talent.

The UK Government's guiding light on IT

BCS is the only Trailblazer Apprenticeship end-point assessment and awarding body dedicated solely to the IT and digital industries. We're trusted by the UK Government to act as a guiding light to the IT profession.

Partnering with BCS shows that your training organisation is serious about its IT and digital industry credentials, and is dedicated to turning apprentices into the digital leaders of tomorrow.

Digital Industry Trailblazer Apprenticeships

Why offer Digital Industry Trailblazer Apprenticeships?

- Give employers confidence that their apprentices will develop the skills their business needs for a successful future.

- Empower organisations to recruit new IT and digital talent with confidence.

- Demand for these apprenticeships will increase as employers recognise the benefits.

- The new standards attract a higher level of Government investment, including vendor and professional certification funding for the first time.

- Trailblazer Apprentices will benefit from BCS membership for the length of their apprenticeship.

- Give apprentices a direct route to professional recognition on the *Register of IT Technicians (RITTech).

Why partner with BCS?

- BCS is the only end-point assessment and awarding organisation that's both the professional body for IT and Ofqual recognised.

- We understand the complexities of Government funding schemes and can provide help and guidance in liaising with the Skills Funding Agency.

- BCS offers accredited status for Training Providers, includes RITTech accreditation and a dedicated Account Manager to support to your organisation.

- Access to the new BCS Partner Programme.

Network Engineer

Apprentices will train to design, install, maintain and support communication networks, as well as provide maximum performance and availability for their users. By the end they will understand network configuration, cloud, network administration, monitoring tools, plus be able to give technical advice and guidance.

Software Developer

Apprentices will train to build and test simple, high-quality code across front end, logic and database layers. Working as part of a team, they'll be responsible for elements of an overall project. By the end they will be able to interpret design documentation and specifications, debug code and can understand the structure of programmes.

Upon completion, apprentices will be operating at SFIA/SFIA*plus** level 3 and clearly able to map their future career progression.
